**** PLEASE NOTE:** All kits 22.5" STEEL/ALUMINUM come with 2- 90 degree outer Aluminum valve stems unless otherwise specified. If your valve stems are currently mounted on a bevel instead of flat, you will need 105 degree bend. Please call Bill if you have any questions on finding the right kit.

*** RE:** Balancing compounds - Currently only a few kits are capable of supporting EQUAL they are indicated by a checkmark. If there is not a checkmark and you are using EQUAL or ANY balancing powder /beads please let us know. We are expecting to be completely EQUAL capable by August 2011. NOTE: EQUAL Capable means that the EQUAL filtered valve core will fit the valve stem.

***** DL1SP Kit -** Please call in and speak with Bill about the wheel type and stabilizers.
